

**NFT has been specialised in tower cranes, passengers and material hoists, and other construction equipment’s more than 35 years.**

Based in Abu Dhabi, the company has a strong presence in the GCC and Middle East and is seeing its business grow beyond the region with offices in Asia, Europe, Africa and most recently Australia.

NFT is able to supply cranes and equipment to any construction project type or take up any technical challenge.

The company’s product portfolio includes small self-erecting cranes (700kg capacity/26m) as well as much bigger slewing cranes like the Potain MD 3200, which is able to carry up to 80 tonnes.

Other products include the hoist models, which range from 1 to 4 tonne lifting capacity and are offered with variable speeds ranging from 36m/minute to the world’s fastest PEGA hoist with a speed of 120m/minute 3.2 ton lifting capacity.

NFT’s fleet now includes more than 1,500 tower cranes, over 300 hoists, and a complete available stock of spare parts.
